EDUCATION

LaGuardia Community College - A.S. in Programming Expected Fall 2026

- Relevant Coursework: Object-Oriented Programming (Java), iPhone App Development, Data Structures & Algorithms, C++ Programming, Web Development I, Intro to Visual C# Programming, Computer Science Fundamentals

TECHNICAL SKILLS

- Languages: Java, C++, JavaScript, HTML, CSS, Swift
- Tools: Git, GitHub, Visual Studio Code, Eclipse, Xcode, Figma
- Concepts: Object-oriented programming, arrays, conditional logic, loops, DOM manipulation, localStorage, SwiftUI state basics, responsive web structure

PROJECTS

KovaaK's Tracker - JavaScript, HTML, localStorage **Work in Progress**

- Built a browser-based aim training tracker that lets users add scenarios, scores, categories, subcategories, and session length through a structured form.
- Used JavaScript arrays and objects to manage current session data, then saved completed sessions to localStorage so history persists after page refresh.
- Implemented form validation, dynamic DOM rendering, session history cards, and delete functionality for saved training sessions.
- Added readable code comments and organized logic around user input, session completion, persistent storage, and history rendering.

Personal Portfolio - HTML, CSS, JavaScript

- Built a portfolio website to present technical projects, skills, and contact information in a clean, recruiter-facing format.
- Structured page content with semantic HTML and CSS styling while preparing the site to host downloadable resume and project links.

Overtime Pay Calculator - Java

- Developed a console-based application that calculates regular pay, overtime pay, and total employee earnings.
- Used Scanner for user input and conditional logic to apply time-and-a-half pay for hours worked over 40.

Additional Practice Projects - C++, HTML, CSS

- Completed smaller projects including an Even or Odd Checker and a Marvel character trading card to practice control flow, page structure, and basic styling.

EXPERIENCE

Housing Works - Mover / Logistics Support August 2024 - Present

- Collaborate with team members to complete daily logistics tasks, coordinate movement of donated goods, and support organized warehouse operations.
- Track pickup and drop-off details using manifests and notes, including missing, damaged, or irregular items requiring attention.
- Apply attention to detail, communication, and reliability while handling donor-facing tasks and supporting team workflow.

PROFESSIONAL DEVELOPMENT

Tech Talent Pipeline Residency Program - Participant April 2026 - Present

- Selected for a career-readiness program focused on strengthening technical preparation, professional development, and software career pathways.
- Actively building programming fundamentals through coursework, independent practice, and portfolio projects.
